

HEADSTART®GOLD

Your key to the successful establishment of all grass areas

The natural revolutionary grass seed treatment that ensures rapid germination

We proudly introduce **HEADSTART®GOLD**, the latest in performance enhancing grass seed coatings for sports fields, golf courses, lawns and amenity turf.

HEADSTART®GOLD is a biological germination accelerator which is the second generation of the original HEADSTART® formula.

HEADSTART®GOLD has been further developed and improved in a number of different ways through research, testing and field trial work.

The treatment benefits from minerals such as

Phosphorus, Sulphur, Copper and Molybdenum. These nutrients stimulate root formation, development and growth ensuring that the seedling grass plant develops a strong root system during the critical start-up phase.

This leads to better access to moisture and nutrients and makes the grass seedling plant stronger and more resistant to stress.

In a short time **HEADSTART®GOLD** can help you by giving faster germination, creating stronger roots and ultimately healthier and stronger amenity turf.

HEADSTART® GOLD

Biostimulants

- Promote the supply of nutrients
- Ensure efficient use of nutrients
- Prevent deficiency of trace elements

Enzyme Activity

- Stimulates growth of roots/shoots
- Energy to start photosynthesis

Seaweed Extract with High Cytokinin Content

- Promotes cell division & metabolism
- Leads to faster germination

Molybdenum (Mo)

- Essential trace element for initial growth
- Required for enzymes that are involved with protein formation

Copper (Cu)

- Important trace element for re-growth
- Part of enzymes in photosynthesis/metabolism
- Stimulates production of lignin rigid cell walls

Sulphur (S)

- Basic building block for production of proteins, hormones & vitamins

Phosphorus (P)

- Essential for photosynthesis and synthesis oils, sugars, starches and enzymes
- Enables rapid rooting
- Enhances stress resistance
