

Twig

Chad Wright

Inspired by the contrast between the natural and the built environment, San Francisco-based designer Chad Wright designed Twig in two versions, one of which is suitable for outdoor use. Extended supports rise above a gently arched wooden back, providing a convenient place to hang a coat or purse. The indoor/outdoor version is offered in a variety of bold powder-coated finishes (bright blue, red, sulfur yellow) with an ultra-minimal metal seat and a contrasting wood backrest. For the indoors Twig is offered in a neutral palette (white, charcoal) with either a natural white oak, a charcoal-stained white oak or a hickory seat with matching backrest. Stackable four high (wood seat) or six high (metal seat).
