unfortunate name

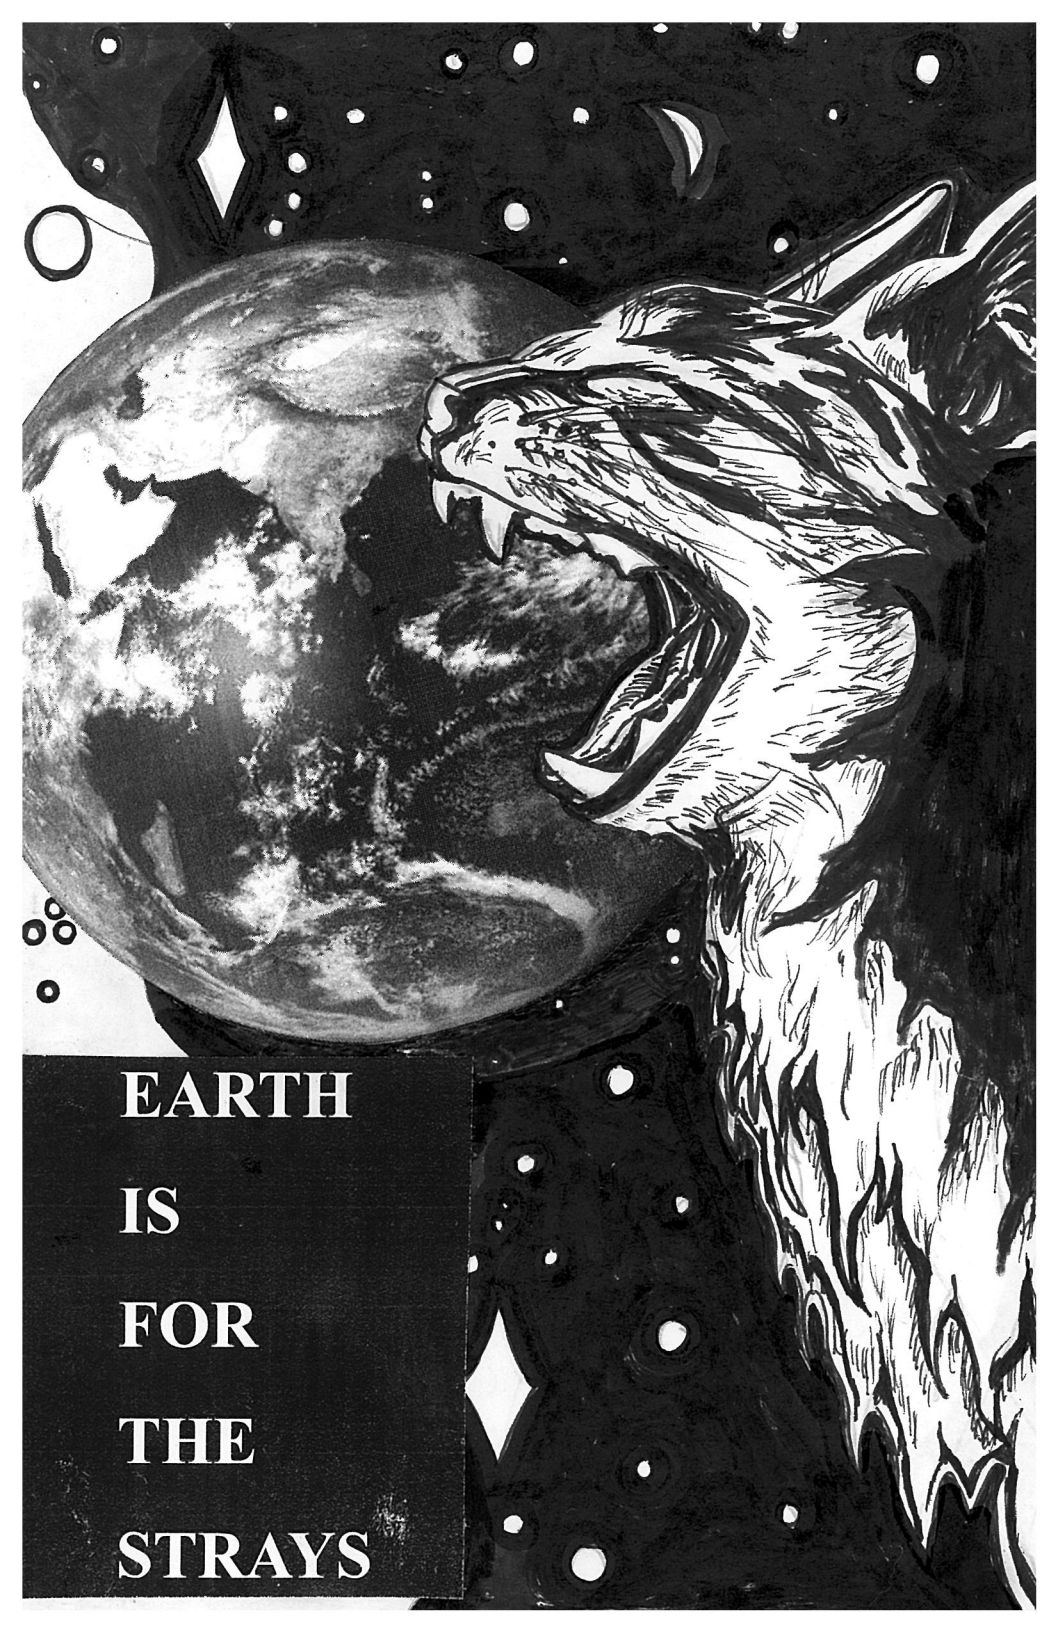

Bombays
were
drawn
to Neptune

Turkish Angoras

graced Mercury

A black and white illustration featuring a wolf's head in profile, howling with its mouth wide open, showing sharp teeth and a tongue. The wolf is positioned on the right side of the frame. To its left is a large, spherical planet with a heavily cratered and textured surface, resembling a celestial body like the Moon or Mars. The background is a dark, starry sky filled with numerous small, bright circles of varying sizes. In the upper left corner, there is a stylized, dark silhouette of a tree or a large rock formation with a prominent diamond-shaped opening. The overall composition is dramatic and evocative, suggesting themes of wilderness, survival, and celestial wonder.
