

## Bio-Brasion Trinity Maintenance Program

Bio-Therapeutic recommends that the Bio-Brasion Trinity be serviced once every 12-18 months to maintain optimal results and ensure the unit is running properly. The average lifespan of the Bio-Brasion Trinity is 4-5 years, and the average Bio-Brasion Trinity should have maintenance at least 2 times within that life expectancy, with as many as 5 times depending on use and preference. You may register for a Maintenance Program within 6 months after purchase date.

### Maintenance Inclusions

- Full testing of the entire unit, internally and externally
- Replacing any filters and/or tubes as needed
- Assessment of any damage and/or wear and tear on the internal components
- Shipment back to the customer via 2<sup>nd</sup> Day Air
- Tubes, filters, and small miscellaneous parts are included and considered part of the maintenance program. Anything that goes outside of tubes, filters and small miscellaneous parts is considered a repair and will be charged accordingly for parts and labor of the repair.
