

## Life's A Beach

### Top Tip

Why not add any left over water onto your garden or house plants. A great way to not be wasteful with water and helps your plants grow too!

### Ingredients:

Small Paddling Pool  
Small ducks or floating toys

### Method

A fun way to explore water and develop that all-important pincer grip is with water beads. You can pick up water beads easily online and simply follow the instructions to prepare. The texture is amazing, they feel a little like jelly in ball form so they add an extra sensory dimension to any water activity. Add some tongs, scoops or cups to see how many your little one can collect or simply run your fingers (or even toes) through to explore the sensation.
