

Sensory Corn Flour

Top Tip

Let baby enjoy how gloopy and gooey it feels as it oozes through their hands and runs through their fingers!

Ingredients:

- 2 cups of cornflour
- 1 cup of water

Method

Mix the cornflour and water (and food colouring if used) in a bowl until it forms a gloopy mixture.

It's so quick and simple! Feel free to play with the consistency until it is how you would like it - add more cornflour or water to make it thicker or thinner.

Add bowls and utensils for them to stir and play, or you could even drop in a few washable toys for them to coat with their gooey mixture!
