

## Water beads wonder

### Top Tip

Water beads should always be a supervised activity. Put a few on your Tidy Tot Tray and enjoy exploring this fun activity together

### Ingredients:

water beads  
tongs  
scoops  
cups

### Method

A fun way to explore water and develop that all-important pincer grip is with water beads. You can pick up water beads easily online and simply follow the instructions to prepare. The texture is amazing, they feel a little like jelly in ball form so they add an extra sensory dimension to any water activity. Add some tongs, scoops or cups to see how many your little one can collect or simply run your fingers (or even toes) through to explore the sensation.
