

CHLORWASH

MACHINE DISHWASHING COMPOUND

DESCRIPTION

CHLORWASH is a powdered chlorine based machine dishwashing compound used for the use in automatic washing machines. Suitable for domestic and commercial use.

BENEFITS

- **CHLORWASH** is a concentrated and fully blended powdered detergent formulated for removing of fats, grease, oils, tea and coffee stains even with hard water.
- **CHLORWASH** cleans and sanitises dishes, crockery, plastic ware, glasses and cutlery in commercial or domestic dishwashing machines.
- **CHLORWASH** is low foaming and free rinsing
- **CHLORWASH** contains water softeners that soften even extremely hard water, reducing scale build-up in machine interiors.
- **CHLORWASH** contains an organic chlorine, which remains stable in heat and therefore is effective for long periods killing bacteria and bleaching out stains.

DIRECTIONS

When refilling tank or on initial wash, add 1/4 a cup (60grms) of **CHLORWASH**. For every 5 washes thereafter, add a further tablespoon.

Dilutions may vary with wash tank volume.

For domestic washing machines fill powder container if fitted or add 1/4 cup (60gm) per wash.

WARNING

Avoid skin and eye contact.

FIRST AID

If poisoning occurs contact a doctor or poisons information centre. PH 13 11 26. If swallowed do not induce vomiting, give milk or water and seek medical advice. If skin contact does occur remove contaminated clothing and wash thoroughly with water. For eye contact, irrigate with water for 15 minutes. If irritation persists seek medical advice.

PACKAGING

CHLORWASH is available in 5 and 20 kg containers.
