

SKYCAMP 3.0

www.basecampaustralia.com.au

UNBEATABLE QUALITY

The Skycamp 3.0's fast, easy set up is only possible because of the careful design and the quality of every part. Skycamp's folding design has been perfected to create a comfy tent that literally anyone can set up.

AERODYNAMIC, DOUBLE-LAYERED HARD SHELL

The hard shell of the Skycamp 3.0 is made of FRP (fibre-reinforced plastic) and has a double layer with built-in air insulation, making it soundproof and condensation resistant. Most rooftop tents have a single-layer shell, setting it apart from traditional roof top tents' shells.

DURABLE HONEYCOMBALUMINUM FLOORING

The Skycamp 3.0's floor is made of high-performance honeycomb aluminium panels that are lightweight and strong enough to hold a 1.8-ton Jeep Wrangler! The flat, insulated aluminium panels will give you a much more comfortable night's rest than the rocky, cold ground.

300GSM POLY-COTTON CANVAS

The Skycamp 3.0 tent is made of breathable, water-resistant poly-cotton canvas. To really keep you dry, it also comes with waterproof zippers and a rain fly for extra protection. The problem with most tents is that the thin polyester has a vinyl coating, making it less breathable and increasing condensation. The Skycamp's thicker, heavier canvas will keep you dry, and it's also quieter in the wind.

DETACHABLE TENT

The tent "skin" is just one part of the Skycamp 3.0. It's completely detachable, allowing you to switch it out with our lighter mesh tent in summer or replace the tent after a few years without having to buy a whole new Skycamp.

\$7,080 Rocky Black (Matte)

2022 Improved Design

Feedback from the iKamper global community of 12,000+ members led to key improvements:

Exterior

- **Tent Colour:** introducing iKamper's new canvas and fly tent colour scheme Midnight Grey and Granite.
- **Attention to detail:** the chrome logo has been replaced with the new stylish brushed metal one
- **Easy-access locks:** lock up your tent with ease no matter your rack configuration. You don't need to get your fingers under the tent to lock it.
- **HC Ladder:** easily removable/replaceable with our new brackets
- **Mounting Brackets 3.0:** now compatible with thicker crossbars, lighter, and with rubber bumpers to protect your crossbars.
- **Weatherproof access for electronics** on both the main and extension panels: no need to drill through the panels
- **Tension pole receivers** are easily accessible from inside the tent have been relocated for easier access
- **Strong ripstop rainfly** with an eco-friendly water-repellent (DWR) coating.

Interior

- **Redesigned quilted insulated lining and mattress cover** offer more warmth, less condensation, and a more comfortable & cozy feel
- **Thicker 6.5cm, 9-zone mattress with insulating layer** to reduce condensation
- **Space:** the hardshell was redesigned to allow you to store more inside the Skycamp when closed
- **Windows:** improved zipper design allows you to open both windows at once, and the easy-open system lets you use the outside cover as blinds
- **Black powder-coated, sturdier aluminum poles** to hang lights, Insulation Tent, etc.
- **YKK zippers:** stronger & more durable

- **1 Minute Setup:** Get out of your car and be ready to camp in 60 seconds.
- **Expandable:** The Skycamp 3.0's King-size mattress sleeps 4 people.
- **Aerodynamic and Lightweight Design:** Fits on most vehicles.
- **Breathable:** Insulating Poly-Cotton Canvas tent fabric.
- **Hard Shell Locks:** Closing straps have locks to give you peace of mind.

THE WISE CHOICE

There's a reason why the Skycamp became the most successful tent project on Kickstarter, raising \$2.3 million and shipping to 46 countries within 6 months of starting production.

It took years of hard work, prototypes, testing, failing, re-testing...

We believe you'll be as proud of owning your Skycamp as we are of selling it.
