AUDI Carplay MMI BOX

Specifications

Input	USB/CVBS signal input		
Input	Voltage 12-16V DC		
Rated Current	2A		
Rated Power	24W		
Control	Voice /iDrive control		
Material	Housing aluminum		

Panel description

CAN Power	For power cable connection, CAN data transmission
Antenna	Wifi antenna connector
USB Camera	USB data transmission, and for reverse/front camera conenction
LVDS OUT	Connect with cable labeled 'LVDS-OUT-CIC
LVDS IN	Connect with cable labeled 'LVDS-CIC-C19
Toggle switch	Refer DIP code setting to set for different car models
360 IN	Exterior 360 input (VGA signal input)

Features

- >Support wireless/wired Carplay function
- >Support wireless/wired Android auto function
- >Support wireless Airplay function
- >Support wired Autolink function
- >Compatible with OEM and external microphone
- >Support EQ adjustment, lossless sound quality
- >Support HDMI input

>Support USB to play audio and video, support firmware upgrade

>Keep the OEM system function, reversing radar and track display

Setting instruction

FAQ

- 1.Q: What need to be paid attention to during installation?
- A: 1) Make sure that the carplay box is compatible with the installed model, and check whether the label of box matches with the car model
 - 2) Power off during installation
 - 3) After the installation is complete, it is best to lock the car for a few minutes to turn it on, wait until the running test is normal, then restore the car
- 2.Q: While switching to carplay, the screen displays no signal, abnormal screen or no response?
 - A: 1) Check whether the wiring is connected according to the wiring diagram
 - 2) Check if the pins of the lvds cable ports are bent or not in contact, please re-plug it
 - 3) Check whether the dip switch code is correct, Power of f when changing the dip code
 - 4) If the dip switch code and wiring connection are normal after confirming, box still switches to the black screen, contact after-sales service to solve
- 3.Q: I don't have sound when I connect carplay, what can I do?
- A: 1) if your car has AUX function, set on OEM system
 - 2) if no AUX on the car, please connect AMI-to-AUX cable to get sound

- 4.Q: When I call someone, he can hear himself, how to do?
 - A: Solution1
 - 1) There are 4 default options available(Fig.1)
 - 2) Try one by one,after changing the setting, restart to take ef fect

	< Return	Audio			
	Volume		17		•
	εQ				,
	Loudness			on	
	Active Aux)
0	Mic Echo PreConfig				Default 3

- A: Solution2
- 1) Adjust the volume of the original car to normal use
- 2) Turn the volume in 'audio' setting to 13(Fig.2)

- 3) Turn the 'Microphone Volume' to 12
- 4) 'Microphone OP' tune from 0 until no echo is heard
- 5) Adjust 'AEC quality' to 2
- 6) If the caller hears the echo interval for a long time, fine-tune the 'Microphone delay
- 7) If the caller hears a small voice, you can fine-tune the 'Microphone Volume' and 'Microphone PGA'

- 5.Q: Solutions to not being able to connect with carplay?
- A: 1) Click on carplay bluetooth or wifi on the mobile phone
- 2) At the same time, clear the Bluetooth devices on the mobile phone and the car, and then pair and connect
- 3) Go to WirelessDev to reset the Bluetooth, and then pair and (Fig.1)
- 4) Restore the mobile network to the mobile phone
- 5) Check whether the carplay on the mobile phone is turned on (Fig.2)
- 6) Siri permissions are all turned on(Fig.3)
- 7) If necessary, check the antenna (whether it is broken, or attached to the metal, stay away from the box)
