#### **FAQ**

- 1.Q:I don't have sound when i connect carplay, what can i do?
- A:1) Set the AUX output on the original vehicle.
  - 2) Ignore the original car bluetooth instead of just disconnecting.
  - 3) Transfer the fiber cable from the original car to the supplied power plug.
  - 4) Turn up the AUX volume and the media volume.
- 2.Q: I can't connect wireless Carplay automatically, what can i do?
- A: You can do as followinf solutions.
  - 1) Please confirm if you turn on wifi and connect carplay's bluetooth.
  - 2) If your car has OEM bluetooth, please delete the connection record, then reconnect carplay's bluetooth.
  - 3) Please confirm the wifi antenna is away from metal.
  - 4) Please confirm all siri permissions are allowed (Fig. 1)
  - 5) Reset the connection records on the phone and car (Fig. 2) simultaneously, then reconnect.

- 3. Q: The screen will flash, what should I do?
- A:1) The screen power line is not connected by default, and only connected to the splash screen.
- 2) The screen power is connected to the wrong position, it should be connected to the box dial code, please see the specific wiring diagram.
  - 3) The connection of the small gray and green wires on the screen power cord and refer to the previous wiring diagram.
- 4.Q: The screen displays a white, black or fuzzy screen, what should I do?
- A:1) Check whether the LVDS line is connected properly?
- 2) Only transfer the host can line, not the LVDS line. Does the original car screen display normally? If it is normal, the LVDS line is damaged and needs to be replaced.
- 5.Q: When I call someone, he can hear himself, how to do?
- A: 1) Adjust the volume of the original car to normal use.
  - 2) Turn the volume in 'audio' setting to 13.
  - 3) Turn the 'Microphone Volume' to 12.
  - 4) 'Microphone OP' tune from 0 until no echo is heard.
  - 5) Adjust 'AEC quality' to 2.
  - 6) If the caller hears the echo interval for a long time, fine-tune the 'Microphone delay'.
  - 7) If the caller hears a small voice, you can fine-tune the 'Microphone Volume' and 'Microphone PGA'.

6.Q: The 6.Q: The screen is not displayed correctly, the display is not complete, or the icon is missing, what should I do?

A: According to the dial code table of the screen size, try several more dial codes, and each time you change the dial code, you need to power off.

7.Q: I install the carplay, but the button on steering wheel can't work.

A: Set the setting 'Enable wheel key' to ON(Fig.1)

8.Q: The original car has 360 panoramic camera, how should I set it?

A: 1) Open the CarPlay interface, enter the CarPlay Settings, find the item of reversing, and press OK to enter the reversing option interface.

- 2) In the reversing option, select the reversing camera option and set it to the original car.
- 3) The three options of reversing detection line, reversing display track and reversing display radar are set to off.
- 4) Match the original car reversing option set to high, match 360 display set to off.

9.If the screen flashes after installation, please do the following:

(The last two digits of the power cord label)

15H: Rocker control mode, the default is not connected to this line. When the screen flashes, connect this line, and neither the gray line nor the green line is connected.

17: Knob control mode, the default is not connected to this line. Connect this line when the screen flashes, and the gray line is disconnected and the green line is connected.

19: large touch pad control mode, the default is not connected to this line. Connect this line when the screen flashes, and both the gray line and the green line need to be connected.

Plug the power cord removed from the original car screen
