GROUP ACTIVITIES + TASTINGS

In the Vineyard

Take a walk and enjoy a vineyard tour. **Increasingly, wine lovers are interested in where the wine in their glass comes from and how it is grown.** Our wine experts share how Cisco's sensor technology allows Bouchaine to make block-by-block vineyard decisions, thereby reducing our carbon footprint in the vineyard. **During the summer months guests will have the chance to try grapes fresh off the vine.** Following the tour, guests will taste several wines on our vineyard terrace, overlooking the bay with fabulous views towards San Francisco.

For an even greater experience, ask our staff to create a "scavenger hunt" designed just for your team.

GROUP ACTIVITIES + TASTINGS

Grape Stomp

Have you ever stomped grapes with your feet? When Lucille Ball tucked her skirt into her belt and climbed into a barrel of grapes in 1956, she set the American perception of winemaking back a good century, but she also inadvertently jump-started a grape crushing craze. Traditionally, the winemaker's family harvested and crushed wine grapes using a large barrel, stomping feet, and gravity. We are happy to keep this tradition alive at Bouchaine Vineyards!
