

Features

- 2-way performance coaxial speaker system which combines outstanding sound quality with versatile physical integration options
- High efficiency and 3 Ohms technology for maximized power output of the amplifier
- Automotive grade FlexConnect terminal allow fast and secure connection as well as direct connection to the original cable harness due to optionally available car-specific adaptors
- Tweeter
 - 0.75" / 20 mm tweeter with titanium dome for accurate and dynamic treble response
 - Highly efficient neodymium magnet for high magnetic flux linearity
- Midrange
 - 4" / 100 mm midrange with unique Cenosphere coated paper cone for precise and detailed sound reproduction
 - High-tech polymer composite basket reinforced with glass beads for enormous rigidity and minimized ringing
 - Shallow neodymium magnet system for low installation depth and high efficiency
- Crossover
 - Integrated with 6 dB slope
- Designed for the optionally available car-specific FlexMount100 adaptors which allow an acoustically optimized and professional integration in the original mounting location of the vehicle
