

Features

- 2-way performance coaxial speaker system which combines high efficiency with outstanding sound quality
- 3 Ohms technology for maximized power output of the amplifier
- Automotive grade ProConnect connection terminal allows the use of conventional speaker cables or a fast, secure and fail-safe connection via optionally available WireKits
- Tweeter
 - 0.75" / 20 mm tweeter with titanium dome for accurate and dynamic treble response
 - Highly efficient neodymium magnet for high magnetic flux linearity
- Midbass
 - 5.25" / 130 mm midbass with unique Cenosphere coated paper cone for precise and detailed sound reproduction
 - High-tech polymer composite basket reinforced with glass beads for enormous rigidity and minimized ringing
 - Powerful magnet system for high efficiency and optimum impulse response
- Crossover
 - Integrated with 6 dB slope
- Designed for optionally available, car-specific WireKits which allow a non-destructive integration
