

CONNECTING THE CAMERA TO THE TRIPOD

1. Prepare the Tripod

Mount the Camera Base on a sturdy tripod that has a $\frac{3}{8}$ " mounting screw.

If your tripod has a $\frac{1}{4}$ " screw, use the provided Tripod Adapter Screw.

If you have a pan/tilt head on your tripod, remove it before connecting the Camera Base.

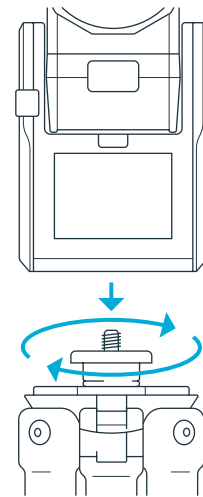

2. Connect the Camera to the Tripod

Hand tighten the Camera Base onto your tripod until you feel light resistance from the panning motor.

IMPORTANT

Avoid excessive manual panning and tilting of the Camera Base motors by hand.

3. Use the Tripod Tool

Use the provided Tripod Tool to finish tightening.

Use a sturdy tripod.
