

TP-L6 Series

Pipe Lasers

- **60-hour battery life**
- **Compact design adds flexibility to set up for tighter invert measurements**
- **Mobile app remote display makes seeing and configuring settings easier**
- **Less time climbing down into holes**
- **Multi-use battery powers a variety of other Topcon job site equipment**

Available Models:

- TP-L6 B (Red)
- TP-L6 AV (Red)
- TP-L6 BG (Green)
- TP-L6 G (Green)
- TP-L6 GV (Green)

The TP-L6 pipe laser's smaller size, long-life battery, and convenient mobile app for Android devices make the unit one of the most flexible on the market. Field crew members are able to spend less time physically entering manholes to make adjustments, thereby increasing safety. The mobile app puts the user in control remotely to visually assist with configuring settings and making adjustments.

One fully charged battery can last for the whole week. Plus, the same multi-use battery can power a variety of other Topcon equipment on active job sites.

The TP-L6 is ideal for contractors that lay pipe required to be at specific slopes as well as projects involving trenching, sewers, mining, and tunneling.

Command and Control – Remotely

The Topcon Laser Manager mobile app for Android puts many of the most common pipe laser functions directly in your hand, such as:

- Automatic target acquisition
- Moving the laser's beam left, right, or center
- Checking grade status
- Activating optional plumb beam
- Setting or calculating grade
- Changing laser mode to steady, flashing, or low-power
- Checking battery status
- Remote view of electronic bubble level

This functionality increases the speed of setting up the laser and reduces time workers spend in manholes, low-light situations and cramped spaces.

Specifications	TP-L6
Auto Line Centering	Yes
Auto Grade Zeroing	Yes
Plumb Reference	Yes
Grade Range	-15% to +40%
Housing Construction	Cast Aluminum
Operating Temperature	-20°C to 50°C
Waterproof	IPX8 when the battery holder is attached
Warranty	5 Years
