

Matador
CAMERA BASE LAYER

PRODUCT DESCRIPTION:

The Camera Base Layer keeps compact DSLR and mirrorless cameras fully protected and accessible during travel and outdoor pursuits. The secure magnetic closure system is optimized for instant camera access and features a protective seam sealed liner that converts to full IPX6 rated waterproof mode when needed. The Camera Baselayer can be worn with a traditional strap or can be attached to bags, belts, and harnesses using the integrated carabiner. A strategically placed accessory pocket stores lens caps, cleaning cloths, extra batteries, or hand warmers to sustain camera function in extremely frigid temps. Full-spectrum protection and superior accessibility make this the perfect solution for outdoor photographers.
