SETTING THE DATE & TIME

Pos. I Position of rest (watch running)

Pos. II Quick-change correction for date

Blocking time for the quick-change day correction is from approx. 9.30 pm and midnight.

- Unscrew the crown by turning anti-clockwise (watch still running).
- Pull the crown out to position II (watch still running).
- Turn the crown until the current date appears.
- Push the crown back into position I.
- Gently push and screw the crown clockwise to secure it into the case.

Pos. III Setting the time

- Unscrew the crown by turning anti-clockwise (watch still running).
- Pull the crown out to position III (watch stopped).
- Turn the crown, until the current time is displayed (remember the 24-hour cycle).
- Push the crown back into position I.
- Gently push and screw the crown clockwise to secure it into the case.

STRAP/FITTING OPTIONS

The Icon models can be fitted with a leather strap, polymer strap, one-piece webbing or a stainless steel bracelet

With a 22mm lug width and 22mm spring bar fixing, straps are easily interchangeable using a forked spring bar tool. Many 22mm aftermarket straps are also compatible*

The Icon straps exclusively available through nitewatches.com can be found [here](#).

The stainless-steel bracelet can be adjusted in length by adding or removing links and by also using the 3-micro adjustment on the buckle part of the strap.

If you have any questions about the Hawk series then please email us on theteam@nitewatches.com.

*Nite Watches accept no responsibility with the sizing and fitting of any aftermarket straps.
