Oxymetholone 50mg is an oral product that is often used by bodybuilders in a steroid cycle. The active substance of this medication is Oxymetholone. Original Oxymetholone 50mg is produced by the world famous brand Dragon Pharma. Packing of this product includes 50 mg (100 pills). Also, oxymetholone should be bought because of the increase in the number of red blood cells, which will get rid of anemia. The duration of the course can be 4-6 weeks. Beginners are advised not to exceed 50 mg per day. Experienced bodybuilders can increase the amount of active substance to 100 mg. This increased dose should be divided into two.

Get emergency medical help if you have any of these signs of an allergic reaction: hives; difficult breathing; swelling of your face, lips, tongue, or throat.. Long-term use of oxymetholone can cause liver tumors or blood-filled cysts in your liver or spleen. Call your doctor at once if you have: nausea, upper stomach pain; ; rapid weight gain, especially in your face and midsection; [great post to read](#)

Anadrol 50 Functions & Traits: The Oxymetholone hormone known, as Anadrol, is a dihydrotestosterone (DHT) derived anabolic steroid that is closely related to methyl-dihydrotestosterone. Specifically, Oxymetholone is DHT with an added 2-hydroxymethylene group, which greatly enhances its anabolic activity. It is also a C17-alpha alkylated (C17-aa). The recommended daily dose in children and adults is 1-5 mg/kg body weight per day. The usual effective dose is 1-2 mg/kg/day but higher doses may be required, and the dose should be individualized. Response is not often immediate, and a minimum trial of three to six months should be given.
