

# Mod GRF (1-29) (CJC-1295 no DAC) UK Legal (1 vial). Real Modified Growth Releasing Factor

Product Name: Mod GRF (1-29) (CJC-1295 no DAC)

Category: Peptides

Ingredient: Modified Growth Releasing Factor

Manufacturer: Sinoway

Qty: 1 vial

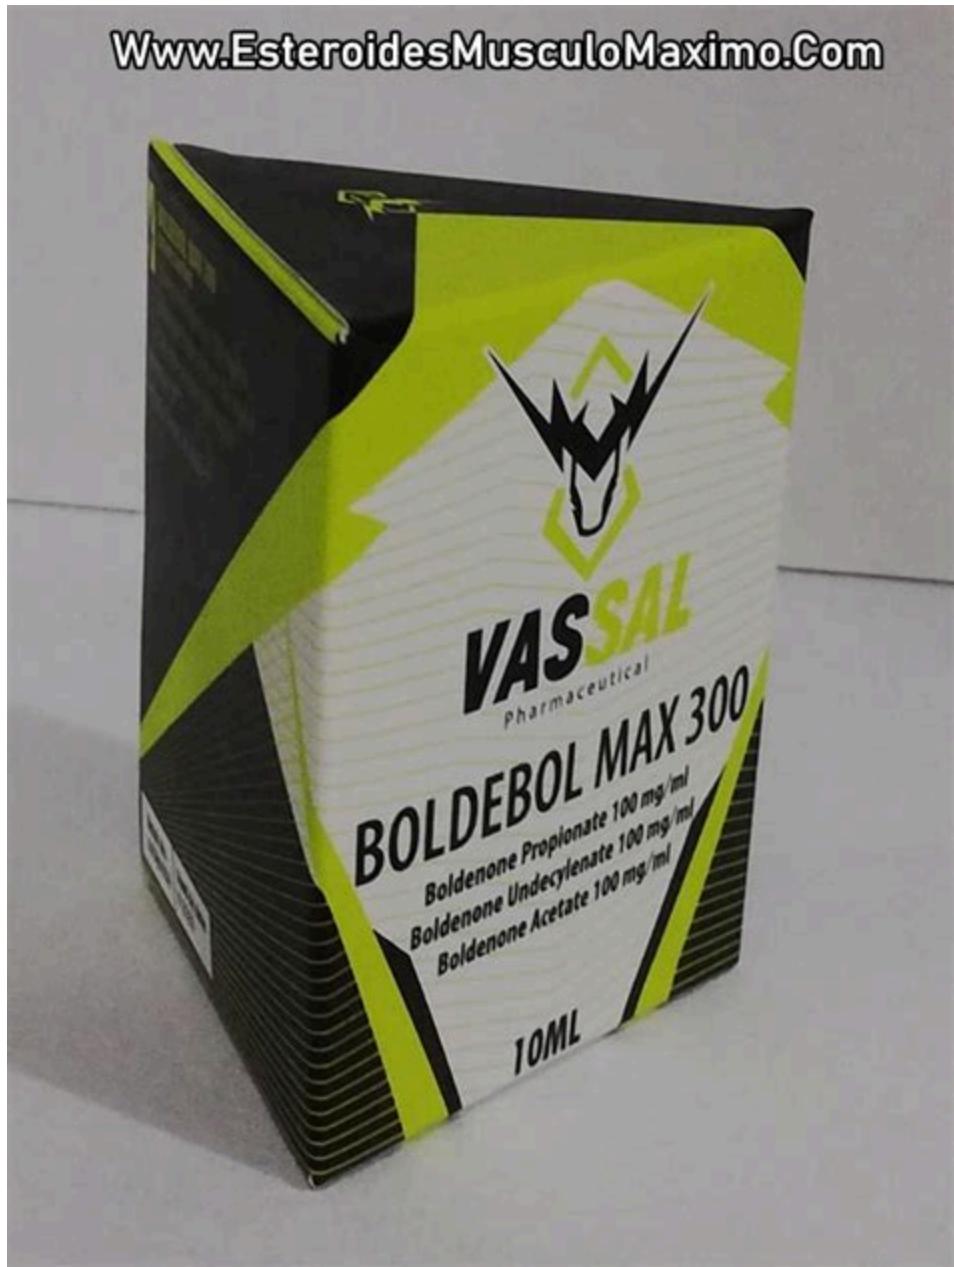

Buy online: <https://t.co/l5FvLqNJEI>

Mod GRF (1-29) 5mg (CJC-1295 no DAC) Modified GRF is a truncated peptide analogue of growth hormone releasing hormone (GHRH). First developed in the 1980s, research studies with modGRF have shown it to improve muscle repair and growth, accelerate wound healing, strengthen bones, increase fat burning, and improve metabolism. CJC-1295 NO-DAC (MOD GRF 1-29) In stock. \$ 19.99 \$ 24.99. Concentration. 2 mg per vial. Purchase this product now and earn 20 Points! Free & Fast Shipping. Earn.

Mod GRF 1-29 cycles for anti-aging and general well being requires the administration of 100mcg of Mod GRF 1-29 (CJC-1295 without DAC) one to two times per day for 4 - 6 months. Although HGH pulses from the pituitary gland are at a minimum with such a Mod GRF 1-29 cycle, such a protocol should ensure that there is enough HGH released to. Modified GRF 1-29 (MOD GRF 1-29) is also known as CJC-1295 without DAC. This chemical is a synthetic analogue of the endogenous growth hormone releasing hormone (GHRH) which has approximately 44 amino acids in its chain structure. Essentially, MOD-GRF 129 is a synthetically made version of GHRH [i] and is responsible for stimulating natural GH.

Mod GRF 1-29 (CJC-1295 NO DAC) 2mg quantity. Add to cart.. Bodily introduction of any kind into humans and/or animals is strictly forbidden by law. Related products Quick View. Catalog Peptides FOLLISTATIN 344 1MG \$ 102.33. Add to cart. Quick View. Catalog Peptides Tesamorelin 5mg \$ 46.33. Modified GRF (1-29) is identical to CJC-1295 without DAC. Research related to Mod GRF (1-29) Modified GRF mediates the same biological effects as GHRH which include muscle growth (hypertrophy), improved bone development, enhanced lipolysis, accelerated metabolism as well as wound healing. it also exhibits a positive influence on the immune.

As I have just stated above, when a person sees the term CJC 1295 without DAC this is really means that they are looking at MOD GRF 1-29. This tetrasubstituted peptide is a modified version of the original GRF 1-29 peptide better known as Semorelin. Due to the extreme short half life of the original GRF 1-29, chemists were able to modify the peptide to offer a longer biological activity that.

The first was simply GRF (1-29) with the drug affinity complex (DAC) attached. Think of that DAC as simply the velcro drug component. As you can see the CJC's are not pure peptides. They called this CJC-1288. It lasted about the same as plain old GRF (1-29). Blood plasma enzymes killed it in minutes. [read the full info here](#)
