

## FAST ATTACHMENT FOR CHAINS | AISI 316

Innovative multipurpose connector for rapid attachment to any part of the chain.

It works great as a part of a snubber or bridle system to take the load off the windlass and/or redirect the boat while anchoring.

It can also be used to redirect chain under load.

Pin secures in place and is not fully removable to prevent loss.

It is very useful for doubling the anchor.

Two versions designed to fit chains from 5 to 13 mm. The first version is for chains from 5 to 8 mm and the second version for chains from 8 to 13 mm.

Made of high quality AISI 316 stainless steel.

Patented.
