To whom it may concern,

**Re: AMD Australian-made disposable face-masks**

As the Australian Paralympic team prepares for the postponed Tokyo Paralympic games this August we need the best possible protection for our team.

These Paralympic games will be like no other. The safety of our Para-athletes, and the quality of the medical masks we use, is a priority for our team management.

We recently tested a number of masks both with our medical team and a select number of Para-athletes.

The quality of protection, breathability and comfort of the Australian-made AMD made it the standout option for all parties who trialled it.

The AMD mask was chosen as our mask of choice for the team in Tokyo.

Our number one priority is the safety of the team and the quality and performance of the AMD mask gives us increased confidence that we can deliver on that.

Paralympics Australia highly recommends AMD masks and welcomes them as the official supporter and supplier of disposable medical masks for our team.

Yours Sincerely,
