To whom it may concern,

Advanced Medical Devices (AMD) supplied Marine Rescue NSW with the NANO TECH FFP2 / P2 Respirator (P2 face masks).

The staff and volunteers of Marine Rescue NSW found the P2 masks to be of a high quality and breathability and very comfortable to wear. The fact that the masks are manufactured in Australia was definitely a consideration when choosing a supplier.

The AMD team and in particular Peter Lee were a pleasure to deal with. Calls and emails were responded to in a prompt and efficient manner. Advised delivery timeframes were met with regular delivery status updates provided.

I recommend AMD without hesitation for the supply of the P2 Respirators.

Kind regards
