# **Spring Plungers**• with moveable ball and internal hexagon 22031.0056

# **Product Description**

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart.

Plastic balls offer electric insulation.

#### Material

### **Body**

· Free cutting steel, blackened

#### **Bearing**

Plastic

#### Ball

· Ball-bearing steel, hardened

#### Spring

· Stainless steel

#### Characteristic

Reinforced spring load: marked with two lines

Standard spring load

Heavy spring load

#### More information

#### Notes

Special types on request. Spring range and forces are precisely tested.

#### References

Thread lock on request, please refer to appendix - Technical Data -Calculation of indexing resistance, see details at the start of the section.
