

Spring Plungers with moveable ball and internal hexagon 22031.0208

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart. Plastic balls offer electric insulation.

Material

- Body**
 - Stainless steel 1.4305
- Bearing**
 - Plastic
- Ball**
 - Stainless steel, hardened
- Spring**
 - Stainless steel

Characteristic

Standard spring load: no marking

Standard spring load

Heavy spring load

More information

Notes

Special types on request.
Spring range and forces are precisely tested.

References

Thread lock on request, please refer to appendix - Technical Data - Calculation of indexing resistance, see details at the start of the section.
