

Spring Plungers with moveable ball and internal hexagon 22031.0250

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart. Plastic balls offer electric insulation.

Material

Body

- Stainless steel 1.4305

Bearing

- Plastic

Ball

- Stainless steel, hardened

Spring

- Stainless steel

Characteristic

Reinforced spring load: marked with two lines

Standard spring load

Heavy spring load

More information

Notes

Special types on request.
Spring range and forces are precisely tested.

References

Thread lock on request, please refer to appendix - Technical Data - Calculation of indexing resistance, see details at the start of the section.
