## Lateral Plungers • smooth, without seal 22150.0030

#### **Product Description**

To be used for positioning and applying pressure, e.g. during painting and sandblasting.

#### **Material**

#### Body

Aluminium

#### Spring

Stainless steel

#### Pin

• Steel, case-hardened, zinc-plated by galvanization

#### Assembly

Installation by pressing in. Formula for calculating the center distance for the mounting hole:  $I_0 = z/2 + w + x$ ,  $I_0$  = center distance, y = workpiece height, w = workpiece length, x = coordinate dimension, s = stroke, z = stop diameter Calculation dimension x: y greater than or equal to  $I_2 - d_2/2$ , then x = d<sub>2</sub>/2 - s or y smaller than  $I_2 - d_2/2$ , then x =  $d_2/2 - s - [(l_2 - d_2/2 - y) * 0,123]$ 

#### Characteristic

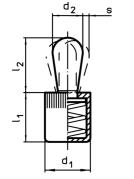

Light spring load = spring from stainless steel

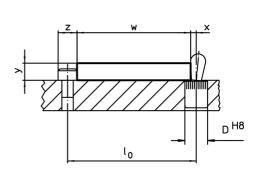

#### More information

#### **Further products**

• Eccentric Mounting Bushings, for lateral plungers, smooth
