Lateral Plungers- with plastic spring and pin 22150.0205

Product Description

To be used for positioning and applying pressure, e.g. during painting and sandblasting.

Material

Spring

Plastic

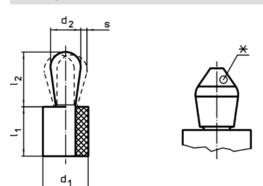

Pin

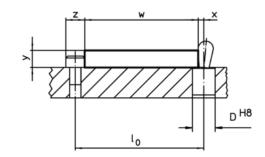

Steel, case-hardened, blackened

Assembly

Moistening the body allows for easier installation. Installation by pressing in. Formula for calculating the center distance for the mounting hole: $I_0 = z/2 + w + x$, I_0 = center distance, y = workpiece height, w = workpiece length, x = coordinate dimension, s = stroke, z = stop diameter Calculation dimension x: y greater than or equal to $I_2 - d_2/2$, then x = d₂/2 - s or y smaller than $I_2 - d_2/2$, then x = $d_2/2 - s - [(l_2 - d_2/2 - y) * 0,123]$ Characteristic Standard spring load = red spring

Drawing

*some sizes (see chart) have a deviating pin shape
