# Centering Clamping Elements with clamping segments 23340.0030

# **Product Description**

For clamping and centering of workpieces with internal bore. Exact self centering with a precision of  $\pm 0,025$  mm. Due to the clamping segments being ground, workpieces with raw and/or machined surfaces can be frictionally connected, centered and held down at the seats. Large adjustment stroke and a low building height are a feature of the centering clamping element. **Mounting from either top or bottom.** 

#### **Material**

## **Body**

· Tool steel, hardened, blackened

#### Spring

Stainless steel

# **Clamping segments**

Stainless steel 1.4112, hardened and ground

#### **Assembly**

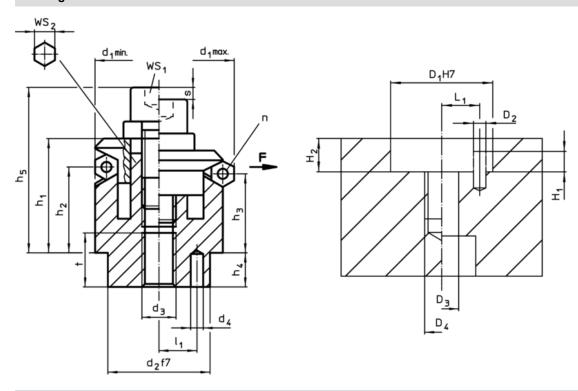

Assembly instruction for mounting from the top: Take-off clamping plate and screw. Fasten body by means of threaded pin via WS<sub>2</sub>.
