Centering Clamping Elements with clamping balls 23340.0222

Product Description

To be used for accurate centering and clamping of workpieces with locating hole on which light spherical marks are acceptable. Exact self-centering with a precision of ±0,025 mm. The clamping balls frictionally center and hold workpieces with raw or pre-machined surfaces down to the bearing points. Large adjustment stroke and a small building height are a feature of this center clamping element.

Mounting from either top or bottom.

Material

Body

· Tool steel, hardened, blackened

Spring

· Stainless steel

Clamping balls

 Stainless steel 1.4112, hardened and ground

Assembly

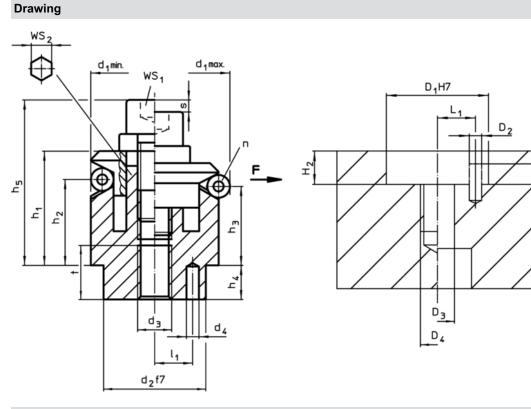

Assembly instruction for mounting from the top: Take-off clamping plate and screw. Fasten body by means of threaded pin via WS_{2} .
