

Torque Handles

24710.0308

Product Description

The handle with integrated torque mechanism allows a defined torque limitation during tightening. Reaching the torque results in a "over-locking". For releasing the torque is transmitted indefinitely.

Material

Cap

- Thermoplastic PA 6, light grey, similar to RAL 7035

Torque mechanism

- Steel, hardened

Body

- Aluminium, black anodised

Inner part

- Steel, blackened
