# Lateral Plungers · smooth, without seal - INCH

## 2B150.0042

## **Product Description**

To be used for positioning and applying pressure, e.g. during painting and sandblasting.

#### **Material**

#### Body

Aluminium

#### **Spring**

· Steel, zinc-plated by galvanization

#### Pin

Steel, case-hardened, zinc-plated by galvanization

#### **Assembly**

Installation by pressing in.

Formula for calculating the center distance for the mounting hole:

 $I_0 = z/2 + w + x$ 

 $I_0$  = center distance,

y = workpiece height,

w = workpiece length,

x = coordinate dimension,

s = stroke,

z = stop diameter

Calculation dimension x:

y greater than or equal to  $l_2$  -  $d_2/2$ , then x =

 $d_2/2 - s$ 

or

y smaller than  $l_2$  -  $d_2/2$ , then x =

 $d_2/2 - s - [(l_2 - d_2/2 - y) * 0,123]$ 

#### Characteristic

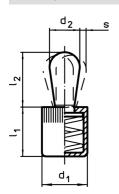

Heavy spring load = spring from steel, zincplated by galvanization
