The Acoustic Adapter plates are optimized for speed disciplines, improving the perception of surrounding sounds and the sense of balance.

GATE MODE

The Chinguard Adapter plates are used for mounting a chinguard to the DOWNFORCE helmet for technical disciplines.

SPOILER

The spoiler at the back of the helmet diffuses the air stream and therefore adds to the aerodynamics, as well as limits the generation of noise.

STREAMLINED DESIGN

The outline of the DOWNFORCE is designed to limit air drag to the minimum.

SUPER LIGHT WEIGHT

Using lightweight components and Dual Density technology, the DOWNFORCE is amongst the lightest racing helmets on the market.

HIGHEST SAFETY LEVEL

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

FIS CERTIFICATION

All DOWNFORCE models are complying to EN 1077, ASTM 2040 and FIS 2013 standards.

ULTRAMATCH

Developed together with our athletes, the DOWNFORCE helmet line is designed to perfectly integrate HEAD's race specific goggles.

CONTEX PRO FEATURES

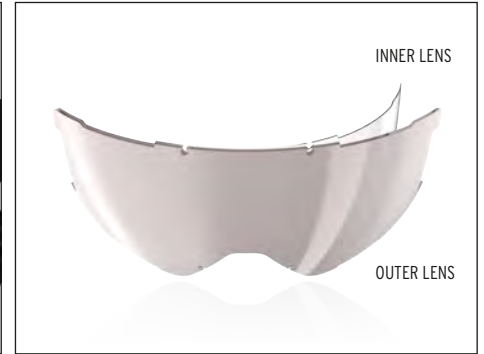

OPTIMIZED TRACTION STRAP

The straps outlets of this goggle are placed in the front, therefore assuring a snug and secure fit when worn together with a helmet, by optimizing the traction applied.

DYNAMIC VENTILATION SYSTEM

The ventilation system is designed to allow air to enter the goggle from three sides, therefore creating an airstream which assures a perfect climate inside the goggle.

LAMINATED DOUBLE LENS
