

PULSE DROP USER GUIDE

VUBER®

PATENT PENDING

PULSE DROP

The **PULSE DROP** battery is a unique 510 battery designed with discretion in mind.

Small and powerful, the PULSE DROP features Vuber's patented "Never Burn" technology, draw activation, USB-C charging, and a unique design that allows you to attach it to your favorite accessories for easy carrying.

INCLUDED IN KIT:

- PULSE DROP Battery
- USB-C Charging Cable

NEVER BURN TECHNOLOGY

Vuber's "Never Burn" Heating Technology, Tapers the Heat as You Draw and Assures You Get the Best Flavor From Your Cartridge.

AUTO ADJUSTS

Reads the Resistance of the Cartridge and Automatically Adjusts for Optimal Use and Fantastic Flavor Profile.

LITHIUM ION CELL

USB-C Pass-Through Port Allows You to Vape While Charging.

THANK YOU for purchasing the VUBER PULSE DROP battery! Featuring Vuber's "Never Burn" technology, the DROP was engineered to be a discreet, simple to use battery that is part of your everyday carry.

CHARGING:

Charge your PULSE DROP before first use, using the included USB-C charging cable. Connect the small end of the USB-C cable to the bottom of the PULSE DROP, and connect the other end to a USB device such as a laptop or a USB outlet.

DO NOT USE "FAST CHARGING" USB ADAPTERS as they may cause malfunctions with the PULSE DROP. Please use the included USB-C cable.

HOW TO USE:

STEP 1 - Attach a 510 threaded cartridge* to the PULSE DROP by sliding the cartridge down into the electrode and turning the cartridge clockwise. **DO NOT OVER TIGHTEN.**

*"Tanker" and other larger diameter cartridges may not fit the DROP. Maximum cartridge diameter is 12 millimeters.

STEP 2 - Inhale through the mouthpiece on the cartridge to create vapor and ENJOY! The light on the bottom will glow, showing activation of the PULSE DROP.

CLEANING:

The PULSE DROP should be cleaned regularly in order to ensure proper function. It is recommended to clean the electrode after each cartridge change. Use a cotton swab dipped in a small amount of isopropyl alcohol and gently clean the connections of both the battery and cartridge. **DO NOT SUBMERGE THE DEVICE IN LIQUID OF ANY KIND.**

TEMPERATURE SETTINGS:

The PULSE DROP only works in auto-adjust mode. You can not override this to manually change the settings - the PULSE battery has this feature. The PULSE DROP will automatically select the best voltage (between 2.8 volts to 3.7 volts) for the cartridge, based on the resistance read from the atomizer.

TIPS & TRICKS:

- The PULSE DROP features pass-through charging, which allows you to use it while it is connected to the USB-C charging cable.
- The PULSE DROP features a unique design that allows for the attachment of accessories like keychains, lanyards, and other designs to hang from the PULSE DROP.
- If your PULSE DROP is fully charged and blinking constantly, try backing the cartridge off half a turn. If this doesn't work, try a different cartridge. If this still doesn't fix the issue, please contact VUBER.
- The PULSE DROP indicator will rapidly blink in red when the battery needs to be re-charged. Use the provided USB-C cable to charge the PULSE DROP.
- Avoid exposing the PULSE DROP to extreme temperatures. If the battery is left in extreme hot or cold, it may malfunction and void the warranty.
- DO NOT modify or alter your PULSE DROP in any way.

LIMITED LIFETIME WARRANTY

Vuber Technologies is proud to offer a Limited Lifetime Warranty on all Vuber devices. To qualify for a warranty claim, register your product within 30 days of purchase. To register or submit a warranty claim, please visit our website.
