TRAINING

Date of Issue

07 October 2022

CPR Renewal Date: 07.10.2023

Valid to 07.10.2025

This unit of competency covers the requirements of HLTAID009 Provide cardiopulmonary resuscitation, HLTAID010 Provide basic emergency life support and HLTAID011 Provide first aid and includes:

Following DRSABCD in line with ARC Guidelines incorporating:

- CPR on adult and infant manikins' • following the prompts of an Automated External Defibrillator (AED) • managing unconscious, non-breathing adult • managing unconscious non-breathing infant
- responding appropriately in the event of regurgitation or vomiting

Applying first aid procedures for:

- anaphylaxis • asthma • non-life-threatening bleeding • choking • envenomation, using pressure immobilisation • fractures, dislocations, sprains, and strains, using appropriate immobilisation techniques • minor wound cleaning and dressing • nosebleed • shock

Managing a simulated first aid incident including:

- identifying the casualty's illness or injury through history, signs, and symptoms • using PPE as required • providing appropriate first aid treatment • conveying incident details to emergency services or advising casualty on any required post incident action • providing an accurate verbal and written report of the incident • reviewing the incident

Guidelines and procedures including:

- ARC guidelines relevant to the provision of first aid • first aid guidelines from Australian national peak clinical bodies • potential incident hazards and risk minimisation processes when providing first aid • infection control procedures, including use of standard precautions and resuscitation barrier devices • requirements for currency of skill and knowledge • first aid codes of practice • appropriate workplace or site procedures relevant to the provision of first aid • contents of first aid kits

Legal, workplace, and community considerations including:

- awareness of potential need for stress-management techniques and available support for rescuers • duty of care requirements • own skills and limitations • consent and how it relates to the conscious and unconscious casualty • privacy and confidentiality requirements

Considerations when providing CPR including:

- upper airway and effect of positional change • appropriate duration and cessation of CPR • appropriate use of an AED • safety and maintenance procedures for an AED • chain of survival • standard precautions • how to access emergency services

Signs, symptoms, and management of the following conditions and injuries:

- allergic reaction • anaphylaxis • asthma • non-life-threatening and life-threatening bleeding • burns • cardiac conditions, including chest pain • choking • diabetes • drowning • envenomation- all current treatments • hypothermia • hyperthermia • eye injuries • fractures dislocation, strains and sprains • nose-bleed • head, neck and spinal injuries • minor wounds • poisoning • seizures • shock • sharps injuries • stroke

Techniques for providing CPR to adults, children, and infants including:

- how to recognise that a casualty is unconscious and not breathing normally • rate, ratio, and depth of compressions and ventilations • correct hand positioning for compressions • basic anatomy, physiology and the differences between adults, children, and infants relating to CPR

The Australian Resuscitation Council (ARC) recommends that people renew their Provide cardiopulmonary resuscitation statement of attainment every 12 months from date of issuance and the Provide first aid statement of attainment every 3 years from date of issuance.
