# SCHÖNWALD

Germany

SCHÖNWALD has been developing and manufacturing high quality professional porcelain for over 130 years. Restaurants, hotels, hospitals and airlines around the world have come to depend not only on the attractive design but also on the professional solutions and reliability. This is not just a few cups and saucers, but a made-to-measure package which combines professional porcelain of excellent quality with personal care. SCHÖNWALD in house designers can produce any design, decor or logo. All items are made in Germany and ordered to your specifications.

## DONNA SENIOR

---

### MAKING DINING MORE FUN:

As we get older, nothing is as easy as it was in younger years. Tying shoe laces, buttoning a blouse and, above all, handling cutlery, plates or cups, suddenly becomes a frustrating experience in everyday life. Minor handicaps result in a lack of confidence and cause some people to lose their pleasure in dining and they subsequently withdraw from the sociable setting of the dining table.

This is why, the German brand SCHÖNWALD has developed a special service: DONNA senior. Furnished with functional aids, DONNA senior makes it easier for people with reduced mobility and motor skills to eat and drink, while at the same time elegantly disguising their limitations.

The range is available in plain white, however, SCHÖNWALD also offers to decorate all items with strong, contrast-rich colours which provide more orientation to residents with visual limitations and to people suffering from dementia.

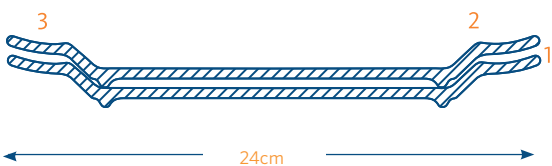

**Plate flat with rim 24cm**

Item No	Ø	H
SH9181824	240	23

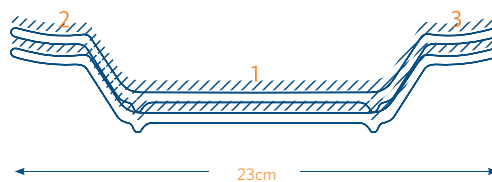

**SPECIAL PLATE FLAT WITH RIM 24CM**

1. Very easy to grip thanks to a raised plate rim.
2. Discreet stripping edge in the transition from the rim to the side helps diners to pick up food safely, even if they have a weak and unsteady hand.
3. Concave-shaped rim as a place to deposit things.

**Plate deep with rim 23cm**

Item No	Ø	H	C
SH9181823	230	40	380

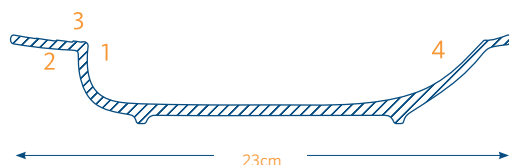

**SPECIAL PLATE DEEP WITH RIM 23 CM**

1. Smaller food area but the same volume thanks to steeper edge. Food cools down less quickly, optimum retention of heat.
2. Discreet stripping edge between rim and edge. Helps diners to pick up food safely, even if they have a weak and unsteady hand.
3. Concave-shaped rim as a place to deposit things.

**Comfort plate 23cm**

Item No	Ø	H	C
SH9181822	230	44	500

**COMFORT PLATE 23 CM**

1. Raised grip at the transition from coupe to rim for single-handed use.
2. Easy to grip thanks to the raised rim on the plate.
3. Discreet stripping edge in the transition from the rim to the side. Helps diners to pick up food safely, even if they have a weak and unsteady hand.
4. Water runs off easily in the dishwasher.

**Polypropylene cover opaque

## HEALTHCARE RANGE FOR MEAL DELIVERY SYSTEMS

Optimise your logistical processes when it comes to distributing meals - SCHÖNWALD has developed the following range specifically for meal delivery systems.

Whether you require Cook & Serve, Cook & Chill or Cook & Freeze the SCHÖNWALD range is the perfect fit for use on the left-hand or on the right-hand side of the climate divider. Even when there are extreme changes in temperature, it is extremely resilient. Very robust and cut-resistant surfaces prevent food deposits and reduce the consumption of detergent in a sustainable way. The special ergonomic handling makes food distribution processes quicker, safer and reduces the rate of breakages. It meets the very high requirements of everyday hospital life in the kitchen and on transport trolleys. The extreme storage capacity of our SCHÖNWALD system porcelain for hot and cold temperatures supports this technology perfectly.

*\*Heat resistant covers are available for all items.*

The Maxadura range is uniquely designed for the Healthcare industry with special attributes of strength, durability, and a whiter, shiny, refined texture.

Each family of pieces has been designed with a unique new style, but Royal Porcelain's cutting edge production processes ensures a colour consistency that will allow pieces to be mixed and matched across all the Maxadura styles.

The concept for this collection derives from the beauty of the silk fabric. The weaving texture gives a soft and tender feeling, a moment where "East meets West" that can be suitable for all dining occasions.

Superware is produced by the world's largest manufacturer of 100% Melamine - Srithai Superware. With over 40 years of experience, and the stringent standards of a global leader, Superware Melamine is of a supreme standard. Superware has a porcelain-like appearance, and is chemical and solvent resistant. All Superware has undergone a glazing process, in the same way porcelain does, which gives it a high gloss finish and improved surface resistance. Independent laboratory test results confirm that Superware Melamine products are free from urea formaldehyde and meet strict Australian sanitation standards. The substantial quality and durability of Superware makes it suitable for a variety of industries and facilities including restaurants, hospitals, nursing homes, child care, catering, airports, mining, canteens, as well as outdoor entertaining.

### FEATURES & BENEFITS

Porcelain-like finish ▪ Strong, durable and lightweight ▪ Stain resistant ▪ Resistant to breaking, chipping or cracking ▪ Heat resistant to 100°C (not suitable for microwaves or ovens) ▪ Slow heat transfer, ensuring food and drinks stay warmer longer ▪ Dishwasher safe

tk | tablekraft™

As one of Australia's most established brands and a hospitality market leader, tablekraft™ presents a calibre of cutlery synonymous with over 30 years of expertise. Showcasing a selection of modern, classic, casual and elegant designs, tablekraft™ offers a range of cutlery that is timeless, iconic and innovative.

*Helpful Hint: Stainless steel is one of the most durable metals available with its exceptional ability to resist stains, rust and corrosion. Contrary to popular belief, stainless steel is neither stain nor rust proof and even the finest alloy will suffer if not cared for. Prolonged exposure to foods that contain Chloride such as; mustard, table salt, eggs and jam can stain if not rinsed off immediately. Some of the minerals and salts in tap water can cause pitting and staining.*

# CUT KNIVES AND BLADES

## CUTTING BOARD POLYPROPYLENE

Coloured boards provide a great tool for controlling cross contamination in a commercial environment. Colour-coding of cutting boards and other utensils designates specific colours to particular food types which can prevent bacteria from raw foods contaminating cooked foods. It also minimises incidences of food tainting, in which strong flavours, such as fish are transferred to more delicately flavoured foods. HACCP Australia recommends the following colour codes which are widely accepted in Australian kitchens (above next to the HACCP logo)

Clive Withinshaw of HACCP Australia says "We have evaluated a number of cutting board against our standard and, to date, only Tomkin Australia's Chef Inox Colour Coded Cutting boards have been certified as conforming to the HACCP Australia Standard. They definitely represent the best in terms of hygienic design and materials".

The Chef Inox Colour Coded boards are manufactured using hygienic, tough polypropylene provides an autoclavable product with high chemical, stain and aroma resistance. These cutting boards will not dull knives, chip, splinter nor warp. They are colour coded, dishwasher safe, non-absorbent and have a temperature range of 20°C to 105°C. They represent the high standard that busy commercial food handlers demand - especially those which to meet the exacting standards of modern food safety standards - particularly important for sure products that have frequent food contact.

- Raw Meat
- Baking & Dairy
- Raw Poultry
- Raw Fish & Seafood
- Cooked Meat
- Fruit & Vegetables

## HACCP PROFESSIONAL KNIVES

Coloured handles help identify each knife with a specific task. Reduces the potential for cross contamination of food during the food preparation process. High quality blades manufactured from special stainless steel containing Carbon, Chromium and Molybdenum, ensuring high hardness, long lasting edges with high resistance to corrosion and excellent cutting power. Ergonomic non-slip handles made from polypropylene for safety and hygiene. A functional and economical product.
