

# Choosing the Right Polypropylene Sorbent

Spill Kits are packed with polypropylene sorbents to help you control and clean-up hazardous substance spills quickly and most importantly, safely. Our sorbents are available in three types; **oil only, general purpose and chemical.**

Oil only sorbents are white in colour, general purpose sorbents are grey, and chemical sorbents are yellow.

The chart below will help you pick the right sorbent for your hazardous substance spill. If a particular chemical is not listed below, please contact our expert team.

## Polypropylene Chemical Compatibility Guide

This information is provided as a guide only. No claims or warranties are expressed or implied as to the absolute accuracy of the data supplied. In all cases it is assumed chemicals in question are at ambient temperatures and pressure and are used in basic state, not in combination or mixtures. Small test sampling by users is recommended to ensure safe application.
