EVERYWHERE IS THE MOST RESPONSIBLE BLANK APPAREL FOR OUR PLANET

Closed Loop

Saves Fresh Water

100% Recycled Cotton

Low Carbon Footprint

Reduces Landfill Waste

Biodegradable

No Microplastics

No Pesticides or Fertilizers

No Dyes or Bleach

Authentic Sustainability

EVERYWHERE'S 100% RECYCLED CIRCOT FABRIC IS FAR MORE SUSTAINABLE THAN ANY ALTERNATIVES

HOW DO YOUR SHIRTS COMPARE?

Recycled Cotton

Organic Cotton

Recycled Polyester

Conventional Cotton

Virgin Polyester

No water used in fiber production

No dyes or chemicals

No microplastic pollution

Low carbon footprint

Diverts waste from landfill

No pesticides used

No farmland occupied to produce

Not sourced from petroleum

Biodegradable

Most Sustainable

Least Sustainable

THE FIRST AND ONLY CLOSED LOOP APPAREL SYSTEM

CirCot™ yarn is knit into soft, durable fabric

CirCot™ fabric is cut and sewn into new **Everywhere®** garments

Everywhere® shirts are enjoyed for years

When the shirt is ready for recycling, scan the tag to order a **free** return envelope

Put your worn **Everywhere®** shirt and other garments you'd like to recycle in the mail

Returned shirts and scraps are collected and sorted by color

Garments and cut scraps are mechanically shredded into spinnable fiber

Shredded recycled cotton fiber is spun into **CirCot™** yarn

**THIS SYSTEM BECOMES YOUR STORY,
SIMPLY BY BUYING OUR BLANKS**

HOW IT WORKS

▶ **Tearaway neck label**
Each garment includes a QR code on a tearaway neck label so your customers can recycle this garment along with anything else in their closet, at no cost to them.

▶ **Unbranded internal side seam label**
This QR code leads to an unbranded recycling experience providing instructions for how to return the shirt to our closed loop supply chain at end of life, making private label a breeze.

▶ **Scan to order an envelope**
When the QR codes are scanned users are directed to a website with an explanation of how our closed loop system works and how to order a **free** return mailer.

▶ **Mail the envelope**
Once the prepaid postage envelope is received, your users fill it with any unwanted clothing and pop it in the mail for recycling back into the supply chain.

▶ **Shred to fluff and respin**
Everywhere® garments are shredded into staple fibers to be spun back into new yarns, or other useful materials based on material content and quality.

 **Closed loop apparel**
Yarn incorporating returned garments is knit into fabric and cut and sewn back into new apparel.

EVERYWHERE'S CLOSED LOOP SYSTEM PROVIDES CIRCULARITY WITH NO ADDITIONAL MANAGEMENT OR EXPENSE

OUR LANDFILL NEUTRAL SUPPLY CHAIN

Everywhere® is dedicated to creating apparel as close as possible to the source of textile waste production - our raw material.

It's equally important to be as close as possible to the end consumer of our garments.

Our landfill-neutral supply chain exists entirely in North America, our home and primary market.

We recycle cotton through a mechanical process that takes color sorted post-industrial and post-consumer cotton fabric and shreds it into reusable staple fiber.

To make black yarn we use black staple fibers, grey staple fibers to make grey, and white to make white yarn. This yarn is then knit into our proprietary 100% recycled cotton fabric, **CirCot™**.

Unlike virgin cotton, there is no water or chemical-intensive bleaching and dyeing process required to get a desired color.

Fiber-shredding and spinning take place in a Global Recycle Standard (GRS) certified facility.

The **CirCot™** fabric is cut and sewn into new garments in Los Angeles.

Garments are thoroughly inspected to ensure they meet our high quality standards and travel to our warehouse in all recycled packaging. They are then shipped directly to you in the same way, with 100% recycled shipping materials.

No supply chain is perfect so we are continually innovating to bring you ever higher quality products with the lowest environmental impact.

YOUR CHOICES MATTER

The impact of **500** **Everywhere**[®] shirts compared to conventional cotton t-shirts

SAVES 404,450 GALLONS OF WATER

Equivalent of a year's worth of drinking water for **2,216** people

~1/20 OF THE CARBON EMISSIONS

Prevents the release of **973** lbs of atmospheric carbon

REDUCES LANDFILL WASTE BY 313 LBS

Equivalent of **1,202** bananas for scale 🍌

REACH YOUR SUSTAINABILITY GOALS

ENVIRONMENTAL IMPACT REPORTS AVAILABLE WITH ANY ORDER OVER 600 UNITS

RECYCLED POLYESTER IS NOT AN ENVIRONMENTALLY FRIENDLY FABRIC

Everywhere's 100% recycled cotton **Circot™** fabric produces no microplastic pollution

THE MICROPLASTICS CRISIS AND RECYCLED POLYESTER

We are all consuming up to a credit card's worth of microplastics each week!

Big fashion loves telling us that recycled polyester is the definition of sustainability. The unfortunate reality is that each time you wash any cotton-poly shirt (even recycled!), it releases microplastics, and these blended materials are more difficult to recycle at end of life.

What's even worse is that recycled polyester garments actually create more microplastic pollution than any other fabric type.

Everywhere's 100% recycled cotton **CirCot™** fabric produces no microplastic pollution. Microplastics are trillions of tiny pieces of plastic that contaminate our environment and our bodies.

WHY RECYCLED COTTON

Textile waste is a landfill catastrophe

Globally a dump truck's worth of clothing and textile waste is put in the landfill every second of every day.

According to the EPA, those of us living in the United States throw away between 70 and 80 pounds of clothing and textile waste each year. That's over three tons of waste in an 80 year life.

Everywhere® upends the obsolete take, make, waste apparel industry standard by producing lothing from 100% GRS-Certified recycled cotton that would otherwise be headed for the landfill.

Going one step further, each of our garments is designed to be recycled through our closed loop system.

WHY RECYCLED COTTON

Cotton Is Thirsty, Water Is Scarce

Cotton cultivation consumes over 21 trillion gallons of water every year with demand from fast fashion only increasing.

Recycled cotton uses no water in fiber cultivation, bleaching or dyeing.

Just one Everywhere® T-shirt saves over 800 gallons of water.

That's over four years of drinking water for the average person.

SUSTAINABILITY & COMPLIANCE

The GRS is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions. The GRS is intended to meet the needs of companies looking to verify the recycled content of their products (both finished and intermediate) and to verify responsible social, environmental and chemical practices in their production. The objectives of the GRS are to define requirements to ensure accurate content claims and good working conditions, and that harmful environmental and chemical impacts are minimised. Everywhere uses only GRS Certified recycled yarns and packaging materials across its supply chain.

Textile Exchange is a community of brands, suppliers, and companies, large and small, from across the textile value chain. Everywhere is a current Member of Textile Exchange and a signatory of the 2025 Sustainable Cotton Challenge. Textile Exchange inspires and equips people to accelerate adoption of preferred materials in the textile value chain, with a focus on carbon reduction, soil health, water, and biodiversity as part of our holistic approach to drive positive impact for the entire industry. United by its Climate+ Strategy, Textile Exchange Members connect, collaborate, and accelerate the rapid adoption of preferred materials for the textile industry for a more sustainable fashion industry.

Sedex is one of the world's leading ethical trade membership organizations, working with businesses to improve working conditions in global supply chains. Sedex Members include many of the world's most recognisable brands, as well as thousands of factories, producers and industry experts. Everywhere is a Sedex Member and is in the process of completing a Sedex 4-Pillar SMETA audit at our sewing facilities. We have completed the Self Assessment and are registered to connect with clients worldwide on the Sedex portal.

Climate Neutral is a nonprofit organization working to eliminate carbon emissions. We are currently in the final stages of our Climate Neutral certification. Climate Neutral works to eliminate global carbon emissions by getting brands to measure, offset, and reduce the carbon they emit. Climate Neutral Certified brands are taking the lead by measuring, offsetting, and reducing their footprints, these brands are setting the standard for corporate climate action. When a brand gets certified, it achieves zero net carbon emissions for all of the carbon it creates while making and delivering its products or services for a year. Everywhere has completed the offsets survey for 2021 and will be fully certified starting March 2022.

All yarns used in our garments are made of 100% GRS (Global Recycle Standard) Certified Fibers

Our fabrics are made of 100% recycled cotton and as such, small specks and minor contamination can occur in the material. This is a part of the nature of using non-bleached, untreated recycled materials and not a reason for return. Slight variances in color and sizing can occur from order to order. Please check you are happy with any color and sizing variances upon delivery as we cannot resolve these issues once you have printed or embellished any garments.
