

## TORSO-ONE

A true hybrid. Cart-based performance inside a hand-carried device.

EchoNous developed the Kosmos platform to give point-of-care clinicians the most information possible at the patient's bedside. By infusing the power and performance of premium ultrasound systems, combined with industry-leading AI, into a sophisticated hand-carried form factor, we have achieved that goal—though we've only just begun.

We build our Kosmos transducers to withstand the rigors of point-of-care- medicine. The Torso-One transducer weighs a mere 275 grams yet will survive a 1-meter drop

## Built for real-life patient situations

Patients inevitably come in all shapes and sizes, presenting with various pathologies. Kosmos was built with this in mind and tested to ensure high-confidence imaging on the most challenging patients. The proof is in the images.

## Continuous and Pulsed Wave Doppler with Tissue Doppler Imaging

With CW, PW and TDI capabilities you can acquire valuable, in-depth information at the bedside to make more confident patient management decisions.

Abdominal

Trio

## Specifications

- Footprint: 20.7mm x 16mm
- 2D Frequency: 1.5 - 4.5 MHz
- Mass: 275g
- Cable Length: 1.8 m
  - Cable Length on OTS: 1.5 m
- Exam Types: Cardiac, Lung, Abdomen
- Modes: 2D, M-Mode, Color, PW, CW Doppler, TDI
- 2D Measurements: Ellipse, Distance
- Doppler Measurements: Comprehensive Doppler Calculations
- Scan Depth: 4 cm - 30 cm
- Maximum Frame Rate: 28 fps

## Device Compatibility

Compatible with the proprietary, ultra-secure Kosmos Bridge platform as well as select off-the-shelf devices

## Durable

Survives 1 m drop, IP67 rated, and validated to cleaning, intermediate, and high-level disinfection

## 5-year warranty

Industry standard 5-year warranty for Torso-One and Bridge
