

Product features:

1. With sealing strip, it is waterproof, fire-proof and high temperature resistant compared with traditional sealing strip.
2. Compared with the traditional hinge, the door is more beautiful to replace, and there is no unsealing or breakage.
3. The mounting board has many spare holes to facilitate expanding product installation and electrical engineering wiring and tightening.
4. The back panel of the box is equipped with mounting wall holes and hoop grooves. It is equipped with galvanized multifunctional mounting plate.
5. High quality cold-rolled or stainless steel plate: door 1.2MM, box 1.2MM, mounting 1.2MM (galvanized, painted)
6. The surface is degreased, pickled, imitated rust phosphating, cleaning, electrostatic spraying, indoor / outdoor two performance, determined according to the customer's use environment.
7. Standardize PG series waterproof connectors for safer use.
8. Internal cooling fan, lower iron box temperature, longer product life.
9. The left side of the product can be separately installed with guide rail, which makes DIY more convenient
10. The product is equipped with American standard socket, which is more convenient for wiring

Product information:

Size: L 380MM * W 270MM * H 105MM
Color: matte white gray
Material: high quality cold rolled steel plate
Door lock: stainless steel 308 outdoor rain proof lock
Sealing strip: EVA sealing strip
Full voltage input cooling fan
American Certified socket

Packing accessories list:

Waterproof iron box	1 SET
Matching waterproof joint PG9	1 SET
Matching waterproof joint M22	3PCS
Matching key	2PCS
Matching screw PWM3*4	3PCS
Matching screw BM3*6*7	8PCS
User manual	1 SET

Product specification drawing

Waterproof connector
PG9 1PCS
M22 3PCS

Assembly screws
PWM3*4 3PCS
BM3*6*7 8PCS

Key x 2PCS
