FITTING TIPS

Fit the Balance Harness® to your dog when they are tired as it may take some fine tuning of adjustments to get the right fit.

Watch the video for more tips.

CHEW PREVENTION

Dogs love to chew. Be sure to remove the harness while not in use and keep out of reach of nylon-loving mouths.

Always supervise your dog when they are wearing the harness. It only takes a blink of an eye for your canine's razor-sharp teeth to start wearing away at the nylon.

MORE TIPS ON THE OTHER SIDE

Pet Products

LOOSE-LEASH WALKING

- If you have a strong puller, use on Multi-Function leash to attached both the front and rear attachment points of the harness.
- Do not allow your dog to practice pulling forward, be sure to stop walking and allow the front clip to redirect your dog to walking towards you when the dog pulls. Once your dog has regained focus on you, begin walking again.
- Has your dog mastered walking politely on leash? Speak with your trainer to see if your dog is ready to begin off-leash heeling. Our Tab leash is the perfect tool to transition your dog to off-leash skills!
