FOR DOUBLE-SIDED CURVED FRAMES

2

1

IMPORTANT:

The top and bottom back horizontal channel bars and ACP040 raising blocks must be ordered separately.

The ACP040 raising blocks push the channel bars away from the structure for a better result when adding a back graphic to a double-sided curved frame. Raising blocks are to be installed between the structure and the channel bars.

Order (4) ACP040 blocks for the Xperience 8' x 8' curved frame and (6) ACP040 blocks for the Xperience 10' x 8' curved frame.
