Hofmann Megaplan BL1500 EV/HV Battery Table Lift

www.morelli.co.uk

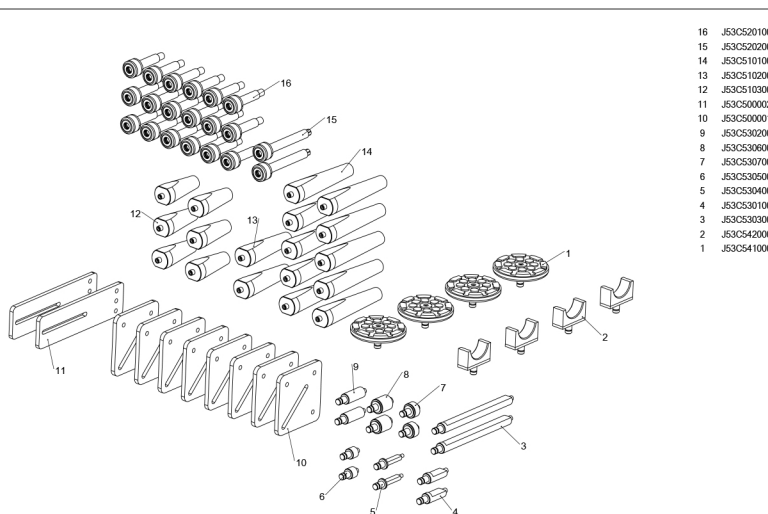

The Hofmann Megaplan BL1500 provides the ultimate in flexibility for a variety of workshop lifting requirements – engines, gearboxes and now Electric Vehicle batteries.

Safe access and removal of the vehicle battery is an obvious lifting conundrum being presented to garages with the introduction of EVs. If you are ready to equip your workshop of the future, Hofmann Megaplan has the solution.

The BL1500, Hofmann's flagship EV battery/table lift, uses a powerful hydraulic system to lift up to 1500kg and incorporates a twinplane automatically tilting table top for the ultimate flexibility when positioning and fixing a heavy component under a vehicle.

Of course, this versatile lift is not restricted to use with EV batteries, it also provides an ideal solution for other workshop lifting challenges, including engines and gearboxes.

The standard 1728mm table top is extendable up to 2027mm. Lifting height is from 740mm to 1800mm.

No installation required.

The BL1500-TTK tool kit accompanies the BL1500 table lift to provide safe locking and securing of lifted objects such as HV/EV batteries.
