I don't think that 400mg/week is low if you are stacking with another anabolic moderately androgenic compound such as Boldenone, Deca or Winstrol. I would take about 250-400mg of Boldenone or Deca with 400mg/wk of Test Cypionate or 50mg daily of oral Winstrol for no more than 6 weeks or oral use. Nov 17, 2005. #9. Okay its still a month or so away, but I'm looking at 400mg of Test Cyp a week. I'll do dbol for the first 2-3 weeks as well. What sides should I be prepared for and how do I negate them? Should my training change at all? Diet.. I know.. lotsa complex carbs and protein.. I'm a little anxious about all this being my first time and all..

Test 400 has the highest concentration (and pain) of any of the mass-produced testosterone blends. Test 400 comes in with the following characteristics per ml: Testosterone Propionate: 25mgs. Testosterone

Cypionate: 187mgs. Testosterone Enanthate: 188mgs.

If it is 200mg/ml cypionate (it should say on the bottle), you are dosing 400mg every 2 weeks. That is what my doc started me on. You should cut your dosage in half and inject weekly instead of biweekly for much better results. 400mg per shot is way too much overload on your system, spikes your E2 unnecessarily high and leaves you with low T levels the last 3-4 days. visit this site right here

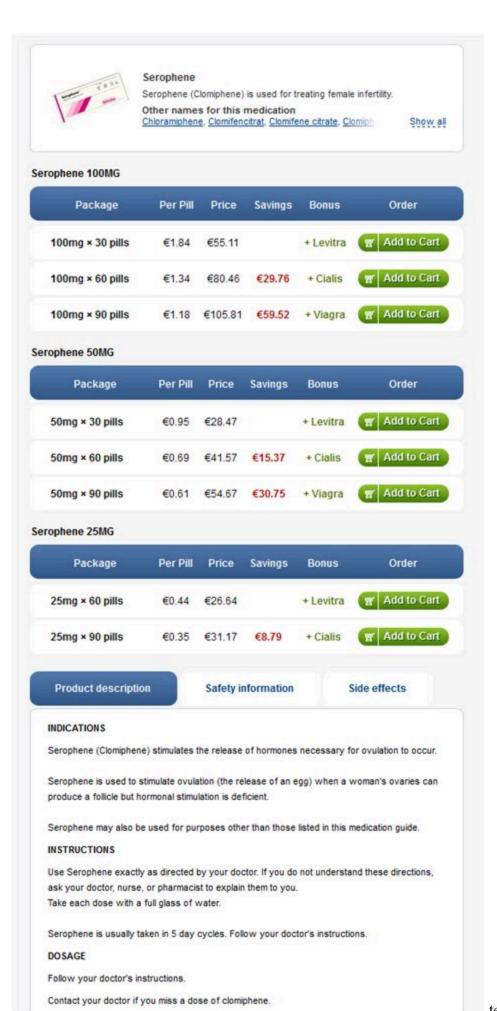

Testosterone cypionate (Depo-testosterone) is an injectable drug used to treat hypogonadism in males. Learn about side effects, warnings, dosage, and more.. In general, the dosage is 50-400. Cycle dose of Testosterone Cypionate. The best cycle of Testosterone Cypionate recommended to beginners is to start with 400 mg to 500 mg of Testosterone Cypionate once a week for 12 weeks. That dosage is divided into two separate injections of about 200 to 250 mg, for example, early in the week, and the other days later.

The standard testosterone

cypionate dosage for beginners is 400 to 500 mg for a 12-week cycle. You'll be injecting testosterone cypionate three times per week (Monday, Wednesday, and Friday). For those who've used testosterone cypionate in the past, the dosage can be increased to 600 or 700 mg; again, this is for a 12-week cycle. 400mg Testosterone Cypionate, IM, once weekly. I really don't know much about testosterone or how high a dose this is. Thought I would ask for advice. If this is a reasonable dose, how could I use it to my advantage in the gym? Should I expect to see good gains at this level? Thank you in advance for the advice.
