ABOUT OUR PRODUCT

A PEEK BEHIND THE SCENES OF OUR FREEZE DRYING PROCESS:

- **Freezing:** Candies start their journey by chilling in a deep freeze, solidifying their water content.
- **Vacuum Chamber:** In a sealed vacuum chamber, reduced pressure and slightly higher temperatures prompt sublimation—the transition of frozen water directly into vapor.
- **Sublimation:** This unique process leaves behind the dehydrated, airy, and crunchy texture that defines freeze-dried candies.
- **Sealing:** The final step involves carefully sealing the candies to preserve their freshness and flavor until you're ready to enjoy them.
- **Quality Check:** Every batch undergoes rigorous quality checks, ensuring Bliss Life standards are met for the perfect balance of crunch and flavor.

And there you have it—the enchanting journey of freeze-drying, where candies transform into delightful, melt-in-your-mouth wonders.
