ACASIS AHD Video Capture Card

AC-VS2851

User Manual

Thank you for choosing ACASIS AHD Video Capture Card. Before installing the video capture card on your host computer, please carefully read the user manual. Please avoid dust, humidity, and extreme temperature. Wish you have a good using experience.
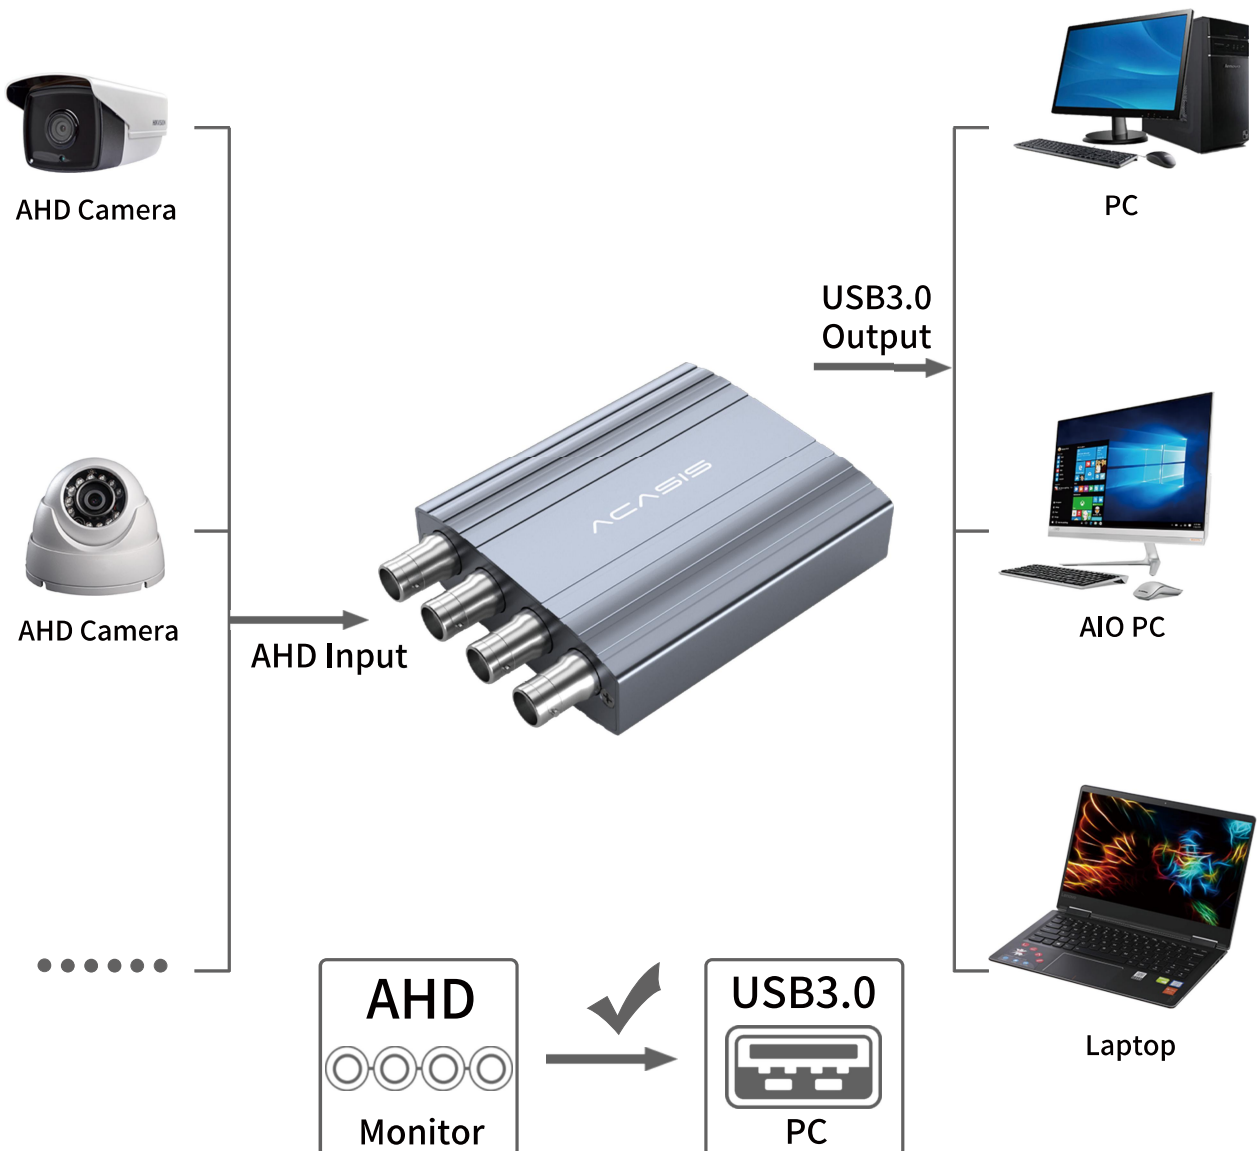

Product Features:

■ 4 channel AHD video signals are input and collected at the same time. Output maximum recording resolution 720@30Hz.

■ Support 720@30Hz video capture and recording.

■ Screen adjustment functions such as brightness, contrast, hue and saturation.

■ Support one machine with multiple channels, the video processing is completed by the capture card, and does not occupy the host CPU.

■ With low power consumption design, all aluminum alloy material, the equipment runs stably for 7×24 hours.

■ Ultra-low power consumption, no need for external power adapter, direct USB power supply.

■ Support Windows XP/2000/7/8/10/Linux.
