**GLASSOLOGY BY ONIS IS BACK**

FOR ITS 3<sup>rd</sup> EDITION

Will you create the world's  
next iconic glass?

**At ONIS, we know the power of glass to make a good drink a great one. We're constantly searching for the next big thing in glassware – and we're looking to the world's best bar professionals to help us create it.**

After being postponed in spring 2020, the Glassology Design Contest is back for its third edition, challenging bar professionals from around the globe to create the world's next iconic glass and have it produced by ONIS.

Bartenders and mixologists worldwide are invited to design glassware that complements cocktails and enhances the drinking experience.

The contest begins this February 2023 as contestants submit their initial designs. In early summer, semi-finalists will be announced and travel to Leerdam Crisal Glass plants, in Portugal and The Netherlands, to finalize their concepts and learn about glassmaking alongside ONIS marketing and design experts.

Then in November, during the acclaimed Athens Bar Show in Greece, six finalists will take the stage to present their glass and have their design taken into production and sold globally.

The 2023 panel of judges will gather top experts from throughout the drinks industry to crown the 2023 Glassology winner. Our judging panel will be announced soon.
