

CD300A

Cyclone dust collector

CD300A cyclone dust collector is a brand new product with beautiful design and great functions. 3HP powerful motor can provide 3000m³/hr air flow volume with dust removal efficiency up to 99%. The micron level high efficient filtration system will completely solve the dust problem and achieve a double separation of wood and dust. Three dust suction ports design will easily meet the needs of using multiple equipment at the same time. 174L large capacity dust bin will satisfy the use with high load requirements. The double base with built on wheels ensures it easy to move around.

Features

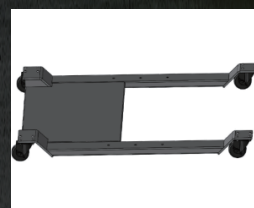

Miron Level High Efficient Filter with Self-clean Function

174L Large Capacity Dust Bin with Bag Supplied for Easy Dust Collection

Triple Dust Suction Ports Design for Multiple Equipment Using

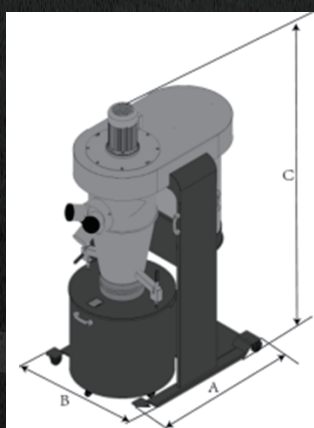

Solid Base with Wheels for Easy Movement

Specifications

Air Flow	3000m ³ /hr
Motor Power	3HP
Motor Speed	2800rpm
Volt	220-240V/50Hz
Amps	12A
Inlet Dia.	1 atφ200mm,3 atφ100mm
Canister Filter Length	660mm
Canister Filter Dia.	φ400mm
Capacity	174L(46GAL)
Net Weight	145Kgs
Main Engine Wooden Size	1235X760X1130mm
Column Carton Size	1550X375x220mm
Filter Element Carton Size	844X540X520mm

Machine Size

Dimension of the Machine

A Length:1000mm

B Width:800mm

C Height:1900mm
