

SmartBench: the latest in CNC routing

“ I’m still in awe over the accuracy of this tech ”

Dallas Moman

SCAN ME

Easy to Use
Intuitive touch screen control and apps

Large Format
Process full 2500mm x 1250mm sheets (8ft x 4ft)

Space Friendly
Pack down in just 3 minutes and store away

Affordable
Our easy to justify CNC is accessible to everyone

Bringing large format cutting to small spaces

Our next generation Yeti spindle and ZHead V2 takes SmartBench to the next level

- Job pause on spindle overload*
- New 1000W Yeti High Performance spindle*
- Digital speed control*
- Twin Lead screw to improve Z Axis rigidity*
- Real time spindle overload display*
- Ready to accept our upcoming shop dust shoe for larger volume extraction systems

All SmartBench versions come with the following great features:

Transport or packaway
Packaway and claim your valuable floor space when not in use. Three minutes is all it takes to get cutting

Accurate & repeatable
Intelligent software works with precision components to reliably deliver accurate finished parts

Control in your hands
Control in your hands with large 7" (175mm) touch screen console

3 axis CNC routing
With x, y and z axis control, bring your ideas to life with 3D routing

Multiple materials
Process a wide range of materials, from timber based to composites to non ferrous metals

Easy to use
Fast accurate setting, in-built dust extraction for a clean work environment

SmartBench PrecisionPro

ZHead V2
230V 1000W Spindle
Digital speed control
Auto Tool Stop if spindle is in constant overload
Real time spindle load display
Precision ER16 collet – max 10mm shank
Dual Z Axis Lead Screws for additional rigidity
Laser X/Y Datum set point system
Can accommodate up to a 10 amp extraction system
