

Next Generation in Control for Traditionally Wired Irrigation Systems

The popular LXME Series commercial controllers have been upgraded, now offering up to 40 programs, a simplified user interface, additional connectivity options, and more. The LXME2 provides 12 stations out of the box, with modular upgrades for up to 48 stations.

Modular Design

- Perfect for traditionally wired new installs or retrofit applications
- Easy upgrade from LXME to LXME2 by swapping the front panel*
- 12-station base unit expandable to 48 stations with 12-Station Modules

Modular Upgrades:

- Station Capacity
- Flow Sensing & Additional 2nd Booster Pump Circuit
- Metal Case & Pedestal
- NCC Network Cartridge for full remote IQ4 access

*Only 12 station modules are compatible with the LXME2

Intuitive Operation

- Large backlit LCD display with easy-to-navigate user interface
- 6 user-selectable languages
- Add or remove modules without powering down
- Remove and program front panel under battery power
- Copy and paste functions for easy programming of multiple stations

Powerful Water Management

- FloWatch™ protection for high and low flow conditions
- FloManager™ manages hydraulic demand
- SimulStations™ allow up to 5 stations to operate at once
- Water Windows by program plus Manual MV Water Window
- Cycle+Soak™ by station
- Intelligent calendar and weather-based delays

LXME2 Front Panel

Easily upgradeable from the LXME, the LXME2 front panel includes 40 programs and a large backlit LCD with easy-to-navigate softkey user interface. Can be purchased as a panel spare only to upgrade from LXME or as a full controller including the cabinet, base module, and 12-station module.

- ESP-LXME2 - Controller DOM 120V
- IESP-LXME2 - Controller International 230V
- ILXME2-AU - Controller Australia 230V
- LXME2-FP - Spare Panel

LX Base Module

Comes included in the LXME & LXME2 controllers. Supports 1 normally open or normally closed master valve and weather sensor. Compatible for service/retrofit with LXME and LXME2 controllers.

- LXBASEMOD - Base Module for non flow LXME & LXME2

Pro Smart Module™

The Pro Smart Module is included in all LXME2 PRO controllers or can be purchased separately to upgrade an LXME2.

INCLUDES:

- » 1 Flow sensor input
- » 2nd MV2/P pump start circuit programmable by station

- ESP-LXME2P - Pro Controller DOM 120V
- IESP-LXME2P - Pro Controller International 230V
- ILXME2-PAU - Pro Controller Australia 230V
- PSM-LXME2 - Pro Smart Module

Pro Smart IQ Connection Module

The Pro Smart IQ Connection Module adds server/client hardwired central control support to your LXME2 PRO. Purchase separately to expand your system capability.

- IQ-PSCM-LXM - Pro Smart IQ Connection Module
